PLANT AN IDEA.
Watch it Grow!

We are all creative! This makes creativity one of the world's most abundant sustainable resources. One small idea planted well and nurtured has the power to change the way we play, work and live. Some ideas even make our world a better place.

"Creativity is the power to connect the seemingly unconnected."

"I'm interested in mathematics only as creative art."

"A creative economy is the fuel of magnificence."

"A moment's insight is sometimes worth a life's experience."

"Creative minds always survive bad training."

"Create to become created."

"It is wise to learn; it is Godlike to create."

"A first-rate soup is more creative than a second-rate painting."

Creativity & Innovation Week
April 15-21 Every Year.
Celebrating the unlimited creativity in all of us.
